Earth Press

Soil & LABS™

Activities for examining place and time

About SpatialLABS

SpatialLABS are ready-to-use, but customizable, spatial investigations for the college classroom. More than 60 labs guide students to apply spatial analysis tools while examining issues related to social and environmental justice, natural resource management, health, business, and more. Licensed annually as a full collection to educational institutions, SpatialLABS provide a regularly revised source of provocative activities to foster students' problem solving strategies.

A library of lab activities

The SpatialLABS DVD includes more than 60 labs that allow students to examine real issues, such as dwindling resources, environmental equity, and global politics, allowing them to feel a sense of personal responsibility and power to make a difference. Each lab activity functions independently, but some labs are organized into sets.

Installation

Install the DVD onto your school's server and share SpatialLABS with faculty across your campus. The installation includes an HTML browser tool that instructors can use to browse descriptions of the labs and download ones they're interested in onto their local computer.

Make them your own

While you may find SpatialLABS great to use as they are, you're free to customize them. Change or add self-assessment questions, tweak the context for the analysis, or rework labs to use local data.

We want to hear from you

Use SpatialLABS, and then tell us about your experience with them.

For more information about SpatialLABS, visit esri.com/spatiallabs. To contact us, email spatiallabs@esri.com.
